Summary

“ Creative UI/UX Designer dedicated to building clean, user-centered digital experiences. Skilled in the end-to-end design process—from wireframing and interactive prototyping to bridging the gap with developers using HTML, CSS, and JavaScript. Experienced in decluttering complex mobile UIs and developing intuitive solutions that directly solve user frustrations. ”

Latest projects

Trailscape

Designed a passenger-focused bus tracking mobile application aimed at improving daily commuting experiences through better information visibility and safety support. The project focused on solving common commuter problems such as uncertain bus arrival times, long waiting periods, and lack of real-time updates.

 Trailscape

Amazon Mobile App Redesign

Led an end-to-end UX/UI redesign of the Amazon mobile app, resolving key usability issues — poor visual hierarchy, a buried Add-to-Cart CTA, and fragmented navigation — through a custom design system (typography, color, spacing tokens) built from scratch. Redesigned 7 core screens guided by clear UX principles, simplifying checkout, search, and navigation for a cleaner, more decisive shopping experience.
